

The League Assists with Research on Voting

League members participated in research to determine if a verification tool created in the School of Computing at Clemson University will improve verification in a variety of environments. Specifically, they investigated different forms of identity verification for voting. The studies involved the Clemson University team playing the role of voters. The “voters” presented various forms of ID to the participants, who then tried to verify the voter’s identity claim in order to allow them to vote or not. The research goal is to determine the effectiveness of various forms of ID for voting.

League participants: Linda Gahan, Elaine Laiewski, Matt Laiewski, Alice Flower, Mary Ann McKenzie, PattiLee Tate, Diana Stafford, Mike Stafford, Aleta Robinson, Sandra Gray, Laura Goldstein, Ron Goldstein, Starlett Craig, Della Baker, Ellen Reneke, Patty Warner, Arlene Stewart, Bill Hare, Elaine Epstein, Bill Epstein, Rosellen Alequire, Ellen Magee, Frances Plotnik, and Don Plotnik. Paula Appling and Eleanor Hare assisted with organization.

Clemson University students from left to right: Jerone Dunbar, Jessica Jones, Jacqueline Galbreath, Alison Nolan, Penny Reid, Jerome McClendon.
